

Webinar: ESG in Financial Markets... Buy and Hold?

Panel Discussion: 10th November 2022

ACI Financial Markets Association www.acifma.com

What is ESG?

This widely-used acronym stands for Environmental, Social and Governance, having been initially used in a 2004 report, produced by 20 financial institutions, that included guidelines and recommendations on how to better integrate the ESG-related issues in asset management, securities brokerage services and associated research functions, following an invitation by the Secretary-General of the United Nations at that time (Kofi Annan).

Since then, we have witnessed turbulent years in financial markets and the challenges to this industry continue to grow. Nevertheless, sustainability in finance is still top of the agenda, even more so after the adoption of the United Nation's 2030 Agenda for Sustainable Development, the Paris Agreement for Global Climate Change and the European Green Deal.
